

# Python Exercise 1 Report

Siyuan Peng

January 12th, 2021

Overall good work!

For 3.1.1, remember there should be no space between print and the left parentheses. So it should be `print()` but not `print ()`.

For 3.1.2, I expected you to write

```
def function(argument):  
    print(argument)
```

For 3.1.3, there should be an indent of 4 spaces before the code `return`.
