

Python Exercise 18 & 19 & 20

Siyuan Peng

January 28, 2021

1 Instructions

You have no homework today.

2 Class Recap

In today's lesson, we used Zelle Graphics to make a solid color fill on one image. We learnt to use `setPixel(x, y, gr.color_rgb())` to add one customized color to an pixel on the image at position (x, y) .

Codes for every classes can be accessed [here](#).
