Project 2 Report

Siyuan Peng

January 23, 2021

Overall, satisfactory work! I love all the shapes in your project. I believe you have devoted tons of your time. The space scene is very colorful! I can see you did a lot of research on the color strings. Few comments to give:

1. For the docstring in a function, we usually write it within the function, instead of before the line of defining.

2. Extensions look fine. Remember to have a separate section to mention extension next time. They are critical to earn an A.

I would give this project 2: $20 + 4 + 4 = 28$.
